Hello Finnish colleagues.

We have hacked the psychotherapy clinic "vastaamo.fi" and taken
tens of thousands of patient records including extremely sensitive
session notes and social security numbers.

We requested a small payment of 40 bitcoins (nothing for a
company with yearly revenues close to 20 million euros), but the
responding to our emails. We are now starting
entries every day.

Appeal court orders release of convicted psychotherapy centre database hacker

If the court reduces his sentence, there's a risk that Aleksanteri Kivimäki will have spent too much time in prison – and then be able to demand compensation from the state.

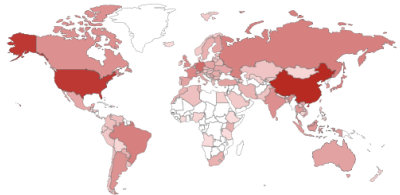

Aleksanteri Kivimäki was seen walking out of the courthouse on Thursday afternoon, amid a gaggle of reporters and photographers. Image: Christoffer Gröhn / Yle

StyleGAN2 (Karras et al.)

A black and white photograph of a person wearing a dark hoodie, seen from the back and slightly to the side. They are sitting at a desk in front of a large computer monitor. The monitor displays a dark-themed interface with lines of white text, resembling a code editor or a terminal window. The person's hands are visible on a keyboard in front of them. The overall atmosphere is focused and technical.

Home About Features Plans

Contact us

Evil Extractor is designed for Windows-Based operating systems, offers two powerful modes: Single Bullet and RAT. Users can combine these modes for advanced attacks. RAT mode facilitates a live connection to the target system, enabling live viewing of the camera and screen, file operations like upload, delete, and download, capturing screenshots, sending fake error messages, and executing various actions. Single Bullet mode streamlines six primary attack types, each leveraging unique features through FTP/Sendmail.

LAPSUS\$

channel

We recruit employees/insider at the following!!!!

- Any company providing Telecommunications (Claro, Telefonica, ATT, and other similar)
- Large software/gaming corporations (Microsoft, Apple, EA, IBM, and other similar)
- Callcenter/BPM (Atento, Teleperformance, and other similar)
- Server hosts (OVH, Locaweb, and other similar)

TO NOTE: WE ARE NOT LOOKING FOR DATA, WE ARE LOOKING FOR THE EMPLOYEE TO PROVIDE US A VPN OR CITRIX TO THE NETWORK, or some anydesk

If you are not sure if you are needed then send a DM and we will respond!!!!

If you are not a employee here but have access such as VPN or VDI then we are still interested!!

You will be paid if you would like. Contact us to discuss that

The screenshot shows the top portion of the MOVEit website. The navigation bar includes the 'MOVEit' logo, a menu with 'OVERVIEW', 'MODULES', 'FEATURES', 'USE CASES', 'RESOURCES', 'WHAT'S NEW', and 'PRICING', a language selector for 'EN', and a 'GET STARTED' button. The main heading is 'Managed File Transfer Software'. Below it is the tagline 'Products to help you get data where it needs to go—securely and efficiently.' Two prominent buttons are visible: a red 'START FREE TRIAL' button and a blue 'REQUEST A DEMO' button. A teal-colored overlay is positioned at the bottom of the page, containing the text '30-day FREE trial. No credit card required.'

**WHAT IS EVEN MORE DANGEROUS
THAN A ZERO DAY VULNERABILITY?**

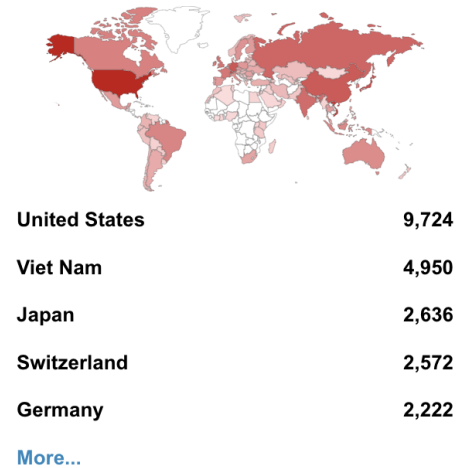

FAO

#	CVE ID	CWE ID	# of Exploits	Vulnerability Type(s)	Publish Date	Update Date	Score	Gained Access Level	Access	Complexity	Authentication
1	CVE-2000-0059			Exec Code	2000-01-04	2008-09-10	10.0	None	Remote	Low	Not required
PHP3 with safe_mode enabled does not properly filter shell metacharacters from commands that are executed by popen, which could allow remote attackers to execute commands.											
2	CVE-2000-0967			Exec Code	2000-12-19	2018-05-03	10.0	None	Remote	Low	Not required
PHP 3 and 4 do not properly cleanse user-injected format strings, which allows remote attackers to execute arbitrary commands by triggering error messages that are improperly handled.											
3	CVE-2004-0542			Exec Code	2004-08-06	2022-07-01	10.0	None	Remote	Low	Not required
PHP before 4.3.7 on Win32 platforms does not properly filter all shell metacharacters, which allows local or remote attackers to execute arbitrary code, overwrite files, and access sensitive information via (1) the "%", " ", or ">" characters to the escapeshellcmd function, or (2) the "%" character to the escapeshellarg function.											
4	CVE-2004-1018			DoS Exec Code Overflow Bypass	2005-01-10	2020-12-08	10.0	None	Remote	Low	Not required
Multiple integer handling errors in PHP before 4.3.10 allow attackers to bypass safe mode restrictions, cause a denial of service, or execute arbitrary code via (1) a negative offset in the "integer overflow/underflow" in the pack function, or (2) an "integer overflow/underflow" in the unpack function. NOTE: this issue was originally REJECTED by its CNA before publication, but that decision is in active dispute. This candidate may change significantly in the future as a result of further discussion.											
5	CVE-2004-1019	20		DoS Exec Code	2005-01-10	2018-10-30	10.0	None	Remote	Low	Not required
The deserialization code in PHP before 4.3.10 and PHP 5.x up to 5.0.2 allows remote attackers to cause a denial of service and execute arbitrary code via untrusted data to the unserialize function, which results in "information disclosure, double-free and negative reference index array underflow" results.											
6	CVE-2004-1063			Exec Code Bypass	2005-01-10	2020-12-08	10.0	None	Remote	Low	Not required
PHP 4.x to 4.3.9, and PHP 5.x to 5.0.2, when running in safe mode on a multithreaded Unix webserver, allows local users to bypass safe_mode_exec_dir restrictions and execute arbitrary code via shell metacharacters in the current directory name. NOTE: this issue was originally REJECTED by its CNA before publication, but that decision is in active dispute. This candidate may change significantly in the future as a result of further discussion.

Aaron Skonnard, Cofounder and CEO, Pluralsight.

GETTY

A black and white photograph showing the lower bodies and legs of two people sitting on a pool deck. They are holding hands, and their skin is wet with water droplets. The background is a dense, out-of-focus wall of foliage. Overlaid on the center of the image is the text "TECHNOLOGY SHOULD BE A TOOL AND NOT A WEAPON" in a large, white, sans-serif font.

**TECHNOLOGY
SHOULD BE A TOOL
AND NOT A WEAPON**

THANK YOU
